

Zielonka, 7.11.2017

To whom it may concern

Hereby I confirm that Centrum Techniki Okrętowej S.A. seated in Gdańsk, Poland (in short CTO S.A.) has conducted the works for the Polonia Aero, the Cold Flow Turbine Test Facility in Zielonka near Warsaw in Poland.

The Polonia Aero facility is the largest and the most modern laboratory of its kind worldwide, and is used to carry out industrial R&D in the aeronautical industry, including the testing of engine turbine prototypes as well as technological demonstrators used in the production of aero engines.

CTO S.A. carried out successfully in 2016 and 2017 the design and installation works enhancing the testing capabilities of the Polonia Aero facility. During the conduction of the above modernization project CTO S.A. has proven to be a professional and diligent partner.
